

PROGRESS IN NEUROSCIENCE PINS

Seminar Series of the
Brain & Mind Research Institute
Weill Cornell Medical College (WCRC)
&

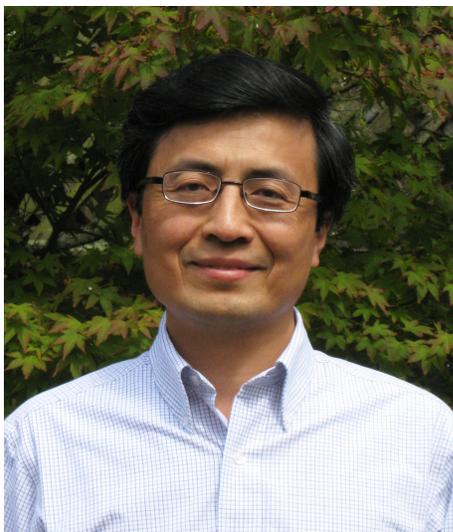

The Graduate Program in Neuroscience of
WCRC and Sloan Kettering Institute

Thursday, 11/30/17, 4 PM, coffee at 3:45 PM

Weill Auditorium

“Exploring the Biological Basis of Neuronal Identity and Diversity: from Transcription Mechanism to Motor Coordination”

Josh H. Huang, Ph.D., Charles and Marie Robertson Professor of Neuroscience
Cold Spring Harbor Laboratory

Abstract

Understanding the biological basis of neuronal identity (i.e. neuron type) is necessary for deciphering neuronal diversity and Circuit organization. I will present our recent progress in understanding the molecular genetic basis and the granularity of neuron types in the cerebral cortex of the mouse using transcriptomic, anatomic, and functional approaches.
